

I'm having AutoIT open up all the docs like this below .(One after another)

Then extract from in between the tags from all the docs.

The image shows a Notepad window titled "lg0001 - Notepad" with a menu bar (File, Edit, Format, View, Help). The text inside the window is HTML code for a mobile phone advertisement. The code includes a title, author name, author description, and content. The content describes the difficulty of choosing a mobile phone and highlights the features of the LG KS 360, such as its sleek design, QWERTY pad, touch screen, and camera.

<authordesc>About the Author:<br>
Choosing between <a href="http://www.dialtosave.co.uk/mobile/" target="_blank">mobile
phone deals</a> can be difficult. You can now compare all the handsets like the <a
href="http://www.dialtosave.co.uk/mobile/mobile-phones/LG/KS360/" target="_blank">LG
KS360</a> and view all the deals and options available.</authordesc>
<content>If you want a mobile phone that offers all the modern conveniences of text
messaging then your search may be over. When you have a teen that enjoys text
messaging more than talking on the phone then you have a problem if the mobile phone
they use is not exactly for text messaging. Mobile phone companies are trying to meet
the demands of the latest craze by providing a mobile phone that teens will absolutely
fall in love with. Text messaging and the modern keypads are just some of their
inspirations on these phones. <br><br>From a teens' point of view, text messaging is
a great way to keep in touch with several friends at the same time. They can organize
a study group, ask questions if they cannot make it to the study group, meet their
friends for a burger, and of course talk about the hottest girl/guy in their school.
On a standard mobile phone the keypad is basically for dialling numbers and an
occasional text message when necessary. This makes it difficult when the teen is
trying to text message all their friends at the same time. In fact, abbreviations have
been created and used in order to shorten the time they need to type a message.
Abbreviations include: BFF or Best Friends Forever, LOL or Laugh Out Loud, and other
abbreviations that save time typing a message on a tiny keypad. <br><br><br><br>
Fortunately mobile phones such as the LG KS 360 can offer so much more because of its
sleek design and the ability to access the QWERTY pad when ever you want to. The LG KS
360 is the perfect for the message text specialist. If you need to be in constant
contact with someone but you don't want to hear the phone ringing constantly that is
where the LG KS 360 will come in handy. From this mobile phone you will be able to
send and receive instant messages, SMS, or send or access your emails. You will also
have the option to browse on sites. <br><br>The LG KS 360 has a touch screen on the
outside which allows you to access anything you need from a simple touch of your
finger, including dialling. The screen can turn 90 degrees to make it easier for you.
When you are ready to text just slide out the keypad. <br><br>Of course there are
several other features with this mobile model such as the 2 mega pixel camera that is
