A paragraph long enough to fill several lines in a narrow column, with accented words (café, naïve, façade) and one very long word to break: antidisestablishmentarianism.

A second paragraph after an explicit line break, to check that the splitter respects the carriage returns of the source text.

Filler paragraph 1: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 2: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 3: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 4: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 5: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 6: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 7: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 8: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

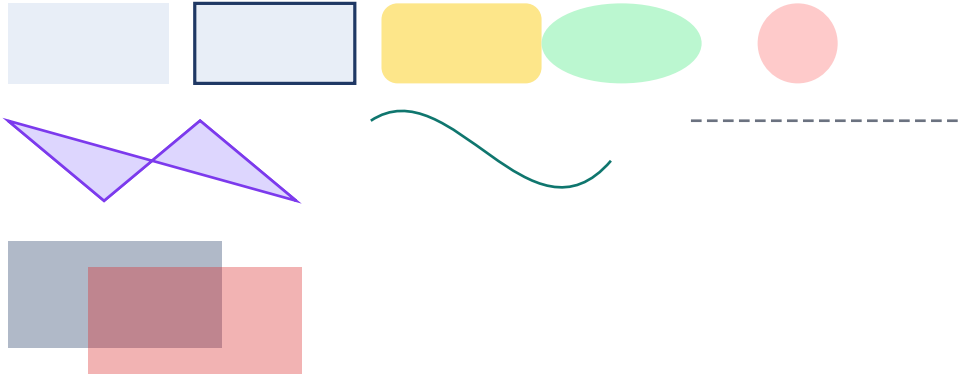

Filler paragraph 9: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 10: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 11: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.

Filler paragraph 12: automatic pagination must move to the next page when the bottom margin is reached, without losing a line.
